

Project Design Phase-II Data Flow Diagram & User Stories

Date	01 July 2026
Team ID	
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified)

Flow

1. User opens the Tableau dashboard to explore UNESCO World Heritage Sites data.
2. Tableau connects to the UNESCO World Heritage dataset (CSV file) and loads the data.
3. Data is prepared (cleaned and transformed) and filters/parameters are applied.
4. Data is processed in Tableau and visualizations & dashboards are generated.
5. Insights and analytics are displayed to the user for exploration and decision-making.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Data Analyst	Data Collection	USN-1	As a data analyst, I can collect UNESCO World Heritage data from reliable sources for analysis.	UNESCO dataset is collected and available for processing.	High	Sprint-1
		USN-2	As a data analyst, I can load the collected dataset into Tableau for analysis.	Dataset is successfully loaded into Tableau Desktop.	High	Sprint-1
	Data Preparation	USN-3	As a data analyst, I can handle missing values in the UNESCO dataset to improve data quality.	Missing values are identified and treated correctly.	High	Sprint-1
		USN-4	As a data analyst, I can create calculated fields required for analysis and visualization.	Calculated fields are created successfully.	Medium	Sprint-1
		USN-5	As a data analyst, I can remove inconsistencies and duplicate records from the dataset.	Clean and consistent dataset is prepared.	High	Sprint-1
	Data Visualization	USN-6	As a user, I can view a bar chart showing UNESCO heritage site distribution by category.	Interactive bar chart is displayed correctly.	High	Sprint-2
		USN-7	As a user, I can view a pie chart representing heritage site categories.	Pie chart displays accurate category proportions.	Medium	Sprint-2
		USN-8	As a user, I can view a line chart showing heritage site trends over the years.	Trend analysis is displayed accurately.	Medium	Sprint-2
		USN-9	As a user, I can explore UNESCO heritage sites using an interactive world map.	Users can identify heritage sites by geographical location.	High	Sprint-2
Project User	Dashboard development	USN-10	As a user, I can access an interactive Tableau dashboard to analyse UNESCO heritage information.	Dashboard is fully interactive with filters and visualizations.	High	Sprint-2
Project User	Story Development	USN-11	As a user, I can explore Tableau Story points that explain analytical insights step by step.	Story points clearly present the complete analysis.	High	Sprint-2

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Website User	Web Integration	USN-12	As a user, I can access the Tableau Dashboard and Story through a Flask-based website.	Dashboard and Story are successfully embedded and accessible via the website.	High	Sprint-3
Website User	Project Information	USN-13	As a user, I can read project details, objectives, and UNESCO information on the website.	Project information is displayed clearly with an attractive interface.	Medium	Sprint-3
Website User	Interactive Navigation	USN-14	As a user, I can navigate between the Home, Dashboard, Storyboard, and About pages.	Navigation works correctly across all web pages.	Medium	Sprint-3
