

Ideation Phase

Define the Problem Statements

Date	30 June 2026
Team ID	
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

				
1. Customer Who is the customer? Describe your target customer or user. Example: Small business owners who sell products online.	2. Need What does the customer need to achieve? Example: A simple and affordable way to manage inventory and track orders.	3. Insight / Reason Why is this need important? What's the underlying insight or motivation? Example: Because they want to save time, avoid mistakes, and focus on growing their business.	4. Existing Solution What solutions are they currently using? Example: They use spreadsheets or manual processes.	5. Drawback / Gap What's not working well with the existing solution? What problems or limitations do they face? Example: It's time-consuming, error-prone, and doesn't provide real-time updates.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A heritage conservation researcher.	Identify which UNESCO sites are most at risk across regions.	The data is spread across disconnected PDFs and spreadsheets.	There is no unified visual analytics tool for World Heritage Site data.	Frustrated and inefficient in prioritizing conservation work.
PS-2	A tourism policy planner.	Understand how heritage site inscriptions are trending by region.	I cannot easily compare historical patterns across countries.	The available data is static and not interactive.	Unable to make timely, evidence-based decisions.
