

Project Design Phase
Proposed Solution Template

Date	02 July 2026
Team ID	
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S. No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	UNESCO World Heritage data contains valuable information, but it's large volume and complexity make it difficult to analyse and interpret. There is a need for an interactive platform that transforms this data into meaningful visual insights to support heritage conservation, research, tourism planning, and public awareness.
2.	Idea / Solution description	Develop an interactive analytics platform using Tableau Desktop, Tableau Public, and Python Flask to visualize UNESCO World Heritage Sites. The solution includes dashboards, story points, maps, charts, and a web application that allows users to explore heritage distribution, site categories, endangered sites, country-wise statistics, and historical trends.
3.	Novelty / Uniqueness	The project combines data visualization, storytelling, and a web-based interface into a single platform. It provides interactive dashboards and story points that enable users to gain meaningful insights about UNESCO heritage sites through an intuitive and visually engaging experience.
4.	Social Impact / Customer Satisfaction	The project promotes awareness of cultural and natural heritage by making UNESCO data easy to understand. It benefits students, researches, tourists, educators, and policymakers by providing accurate visual insights that support education, conservation efforts, and informed decision-making.
5.	Business Model (Revenue Model)	The platform can be adopted by tourism organizations, educational institutions, and government agencies, Future revenue opportunities include premium analytical reports, institutional subscriptions, tourism partnerships, sponsored heritage content, and customized dashboard development services.
6.	Scalability of the Solution	The solution is designed to be scalable and can be extended by integrating real-time UNESCO datasets, additional countries, predictive analytics, AI-based recommendations, mobile applications, cloud deployment, and multilingual support without major architecture changes.
